

Try a Generic and Your First Month is on Us!

From May 1 to June 30, 2009, you may be eligible to receive your first one-month supply of a generic fibrate without having to pay anything at the pharmacy! * Fibrates are medications used to lower your triglycerides and raise your HDL or good cholesterol.

Take These Simple Steps to Benefit From This Money-Saving Opportunity

- Ask your doctor if a generic fibrate is right for you.
- Be sure to let your doctor know how a generic fibrate can help you save on your out-of-pocket costs every month – especially since many of the \$4 generic programs feature generic fibrate options.
- Get a new prescription from your doctor.
- Receive the first month of the generic at no cost! *

Your cost share will be waived for the **first one-month supply of a generic fibrate filled between May 1, 2009, and June 30, 2009, at a retail pharmacy only. This offer does not apply to mail service pharmacy. **If your drug plan has a deductible, the deductible must be met before your cost share is waived -- unless your plan waives deductibles for generics or for preventive drugs on an HSA Preventive Drug List.** The offer does not apply to members taking a generic fibrate medication before May 1, 2009.*

Buying Generic Prescriptions Puts a Little More Money in Your Wallet

Taking your fibrate as prescribed is important. Choosing a generic is an easy way to save money at the pharmacy, making it financially easier to follow your doctor's orders.

There are currently three generic fibrate medications available within this program:

- Fenofibrate (Lofibra®)
- Fenofibrate micronized (Lofibra®)
- Femfibrozil (Lopid®)

Although these options may not be a generic equivalent (a drug that contains the same active ingredient at the same dose and formulation as the brand-name drug), they are from the same drug class as the drug you may be taking.

Questions?

Visit www.wellmark.com to view the Wellmark Drug List. Call the Customer Service number on your Wellmark ID card for information about your pharmacy benefits. Should you have questions about generic drugs, ask your pharmacist or doctor.
